Resolution 2019-22

ORDINANCE

REGULATING THE SITING OF WIND ENERGY
CONVERSION SYSTEMS IN MASON COUNTY

WHEREAS, pursuant to Public Act 95-1027, it is the policy goal of the State of Illinois
that 25% of electric energy consumed in the state by the year 2025 be generated from
renewable resources; and

WHEREAS, such policy further states that 75% of the renewable resources must come
from wind power; and

WHEREAS, certain unincorporated areas of Mason County appear to be well suited for
the development of wind energy conversion systems; and

WHEREAS, the County of Mason, State of Illinois is authorized pursuant to 55 ILCS 5/5-
12010 to establish standards for wind farms and electric generating wind devices, and may also
regulate the siting of wind farms in the unincorporated areas of the county; and

WHEREAS, the County Board has heretofore adopted an Ordinance setting forth certain
standards, regulations, and procedures for the safe and orderly development of wind energy
conversion systems in Mason County; and

WHEREAS, the Mason County Zoning Board of Appeals has conducted the required
public hearing and heard testimony and public comments regarding the proposed amendments,
and such Zoning Board of Appeals has adopted a resolution recommending to the County
Board the adoption of the proposed amendments as set forth in Exhibit A attached hereto and
made a part hereof.

WHEREAS, the County Board has determined that it is appropriate and necessary to
amend such Ordinance in various sections as set forth in Exhibit A attached hereto and made a
part hereof.

NOW, THEREFORE BE IT ORDAINED BY the County Board of Mason County that the
Mason County Wind Farm Ordinance as amended and attached hereto and made a part hereof
is hereby approved and adopted.

PASSED, APPROVED, AND ADOPTED by the County Board of Mason County this 9th
day of April, 2019.

KENNETH WALKER, Chairman

ATTEST:

SUMMER R. BROWN, County Clerk
ORDINANCE REGULATING THE SITING OF
WIND ENERGY CONVERSION SYSTEMS IN MASON COUNTY, ILLINOIS

I. INTRODUCTION

A. Title

This Ordinance shall be known, cited and referred to as the Mason County Wind Energy Siting Ordinance.

B. Purpose

This Ordinance is adopted for the following purposes:

1. To assure that any development and production of wind-generated electricity in Mason County is safe and effective subject to reasonable regulations intended to preserve the public health and safety.

2. To facilitate economic opportunities for local residents;

3. To promote the supply of wind energy in support of Illinois' Statutory goal of increasing energy production from renewable energy sources.

II. DEFINITIONS

A. “Applicant” means the entity or person who submits to the County, pursuant to Section V of this Ordinance, an application for the siting of any WECS or Substation.

B. “Fall Zone” means the area, defined as the farthest distance from the WECS Tower base, in which a WECS Tower will collapse in the event of a structural failure. This area is less than the total height of the structure.

C. “Feeder Line” means any power line that carries electrical power from one or more wind turbines or individual transformers associated with individual wind turbines to the point of interconnection with the electric power grid.

D. “Financial Assurance” means reasonable assurance from a credit worthy party, examples of which include a surety bond, trust instrument, cash escrow, or irrevocable letter of credit.

E. “Meteorological Tower” means those towers which are erected primarily to measure wind speed and direction plus other data relevant to siting a WECS Project. For purposes of this ordinance, Meteorological Towers do not include towers and equipment used by
airports, the Illinois Department of Transportation, or other similar applications or government agencies, to monitor weather conditions.

F. "County Board" means the Mason County Board.

G. "Mason County Zoning Board" or "Zoning Board" means the Mason County Zoning Board of Appeals.

H. "Operator" means the entity responsible for the day-to-day operation and maintenance of the WECS, including any third party subcontractors.

I. "Owner" means the entity or entities with an equity interest in the WECS(s), including their respective successors and assigns. Owner does not mean (i) the property owner from whom land is leased for locating the WECS (unless the property owner has an equity interest in the WECS); or (ii) any person holding a security interest in the WECS(s) solely to secure an extension of credit, or a person foreclosing on such security interest provided that after foreclosure, such person seeks to sell the WECS(s) at the earliest practicable date.

J. "Professional Engineer" means a qualified individual who is licensed as a professional engineer in any state in the United States.

K. "Primary Structure" means, for each property, the structure that one or more persons occupy the majority of time on that property for either business or personal reasons. Primary Structure includes structures such as residences, commercial buildings, hospitals, churches, and day care facilities. Primary Structure excludes ancillary structures such as hunting sheds, storage sheds, pool houses, unattached garages and barns.

L. "Property Line" means the boundary line of the area over which the entity applying for a WECS permit has legal control of the purposes of installation of a WECS. This control may be attained through fee title ownership, lease, easement, or other appropriate contractual relationship between the project developer or Owner and landowner.

M. "Public Conservation Lands" means land owned in fee title by state or federal agencies and managed specifically for conservation purposes, including but not limited to state and federal parks, state and federal wildlife management areas, state scientific and natural areas, and federal wildlife refuges and waterfowl protection areas. Public conservation lands do not include private lands upon which
conservation easements have been sold to government agencies or non-profit conservation organizations. Public conservation lands also do not include private lands for which the owners have entered into contractual relationships with government or non-profit conservation organizations for conservation purposes.

N. “Substation” means the apparatus that connects the electrical collection system of the WECS(s) and increases the voltage for connection with the utility’s transmission lines.

O. “Transmission Line” means those electrical power lines that carry voltages of at least 69,000 volts (69 KV) and are primarily used to carry electrical energy over medium to long distances rather than directly interconnecting and supplying electric energy to retail customers.

P. “Wind Energy Conversion System” (“WECS”) means all necessary devices that together convert wind energy into electricity, including the rotor, nacelle, generator, WECS Tower, electrical components, WECS foundation, transformer, and electrical cabling from the WECS Tower to the Substation(s).

Q. “WECS Project” means the collection of WECSs and Substations as specified in the siting approval application pursuant to Section V of this Ordinance.

R. “WECS Tower” means the support structure to which the nacelle and rotor are attached.

S. “WECS Tower Height” means the distance from the hub of the rotor to the top surface of the WECS foundation.

T. “Wind Turbine” means any piece of electrical generating equipment that converts the kinetic energy of moving wind into electrical energy through the use of airfoils or similar devices to capture the wind.

U. “Hearing Facilitator” means an individual appointed by the County Board to preside over any hearing required under this Ordinance who shall be empowered to facilitate the orderly conduct of the hearing.

V. “Like-kind Replacement” means the same brand, model, size, capacity, and specification of rotor, nacelle, generator, WECS Tower, electrical components, WECS foundation, transformer, and electrical cabling from the WECS Tower to the Substation as was installed under the original permit.
W. "Non-functioning Wind Turbine" means any wind turbine generator or meteorological tower that is not operated in a continuous period of twelve (12) months shall be considered non-functioning, unless due to documented maintenance or electrical grid issues and written notice is provided to the County's legal contact.

III. APPLICABILITY

This Ordinance governs the siting of WECSs and Substations in the unincorporated areas of Mason County which are more than 1.5 miles from the corporate boundaries of any incorporated municipality that generate electricity to be sold to wholesale or retail markets, except that owners of WECSs with an aggregate generating capacity of less than 0.5MW who locate the WECS(s) on their own property, and solely for use on their own property, are not subject to this Ordinance.

IV. PROHIBITION

No WECS or Substation governed by Section III of this Ordinance shall be constructed, erected, installed, or located within unincorporated areas of County more than 1.5 miles from the corporate boundary of any incorporated municipality, unless prior siting approval has been obtained for each individual WECS and Substation pursuant to this Ordinance.

V. SITING APPROVAL APPLICATION

A. To obtain siting approval, the Applicant must first submit a siting approval application to the County. The siting of any WECS shall be by Special Use Permit on A-Agriculturally Zoned Land. The Special Use Permit procedure set forth in the Mason County Zoning Ordinance shall govern the process except as otherwise established under this Ordinance, and the terms of this Ordinance shall be in addition to those set forth in the Mason County Zoning Ordinance. Mason County shall review the application and determine whether it is complete in accordance with the application requirements, prior to any hearing before the Zoning Board of Appeals.

B. The siting approval application shall contain or be accompanied by the following information:

1. A WECS Project Summary, including, to the extent available: (1) a general description of the project, including (i) its approximate overall name plate generating capacity, (ii) the potential equipment manufacturer(s), (iii) type(s) of WECS(s),
(iv) number of WECSs, and name plate generating capacity of each WECS, (v) the maximum height of the WECS Tower(s) and maximum diameter of the WECS(s) rotor(s), and (vi) the general location of the project; and (2) a description of the Applicant, Owner and Operator, including their respective business structures;

2. The name(s), address(es), and phone number(s) of the Applicant(s), Owner and Operator, and all property owner(s), if known, and documentation demonstrating land ownership or legal control of the property. Such information shall include all items required with respect to the petitioners or applicants as set forth in 55 ILCS 5/5-12009.5(b)(ii through v)

3. A Site Plan for the installation of WECSs showing the planned location of each WECS Tower, including legal descriptions for each site, guy lines and anchor bases (if any), Primary Structure(s), Property Lines (including identification of adjoining properties), setback lines, public access roads and turnout locations, Substation(s), electrical cabling from the WECS Tower to the Substation(s), ancillary equipment, third party transmission lines, the location of any wetlands, flood plain, drainage ditches, scenic and natural areas within 1,500 feet of the proposed WECS, the location of all known communications towers within 2 miles of the proposed WECS, and the layout of all structures within the geographical boundaries of any applicable setback, construction staging area(s);

4. An permit application filed with the Federal Aviation Administration, together with a proposed WECS Facility lighting plan that describes any lighting which may be required by the FAA including the planned number and location of lights, light color, whether any such lights will be flashing and mitigation measures to control the impact of lighting on neighboring properties;

5. A proposed Decommissioning Plan for the WECS project;

6. An ingress and egress study for all construction and operation, depicting travel routes within Mason County to be used for delivery of equipment and components for construction of the WECS.

7. All required studies, reports, certifications, and approvals demonstrating compliance with the provisions of this
8. **Certification by the applicant of compliance with all federal and state laws, regulations and requirements.**

9. **Submission of an electronic map indicating the location of all parcels included in the project, including PIN and owner name, and showing each WECS location and appurtenances upon those parcels, along with a hard copy of such map.**

10. **Any other information normally required by the County as part of its permitting requirements for siting buildings or other structures.**

C. The Applicant shall notify the County of any changes to the information provided in Section V.B. above that occur while the siting approval application is pending, provided that material changes to the application shall not be allowed. Mason County, at its sole discretion, shall determine whether the change in the application is material.

D. The Applicant shall submit six (6) copies of the siting approval application to the Chairman of the Mason County Board.

VI. **DESIGN AND INSTALLATION**

A. **Design Safety Certification**

1. **WECSs shall conform to applicable industry standards, including those of the American National Standards Institute ("ANSI"). Applicants shall submit certificates of design compliance that equipment manufacturers have obtained from Underwriters Laboratories ("UL"), Det Norske Veritas ("DNV"), Germanischer Lloyd Wind Energie ("CGL"), or an equivalent third party.**

2. **Following the granting of siting approval under this Ordinance, a Professional Engineer shall certify, as part of the building permit application, that the foundation and tower design of the WECS is within accepted professional standards, given local soil and climate conditions.**

B. **Controls and Brakes**

1. **All WECSs shall be equipped with a redundant braking system and controls which limit the rotational speed of the**
blade within the design limits of the rotor. This includes both aerodynamic overspeed controls (including variable pitch, tip, and other similar systems) and mechanical brakes. Mechanical brakes shall be operated in a fail-safe mode. Stall regulation shall not be considered a sufficient braking system for overspeed protection.

C. Electrical Components

All electrical components of the WECS shall conform to applicable local, state, and national codes, and relevant national and international standards (e.g. ANSI and International Electrical Commission). All WECS Project wiring shall be underground to a depth of not less than 36 inches, except where the WECS Project wiring is connected to the transmission or distribution network or in those locations, such as ditches, streams, or other land features which make underground wiring unsafe or impractical.

D. Color

Towers, nacelles, and blades shall be painted white or gray or another non-reflective, unobtrusive color. No advertising or signage, other than required safety warning signs and standard manufacturer nomenclature, shall be permitted up on any portion of the WECS structure.

E. Compliance with the Federal Aviation Administration (FAA)

The Applicant for the WECS shall comply with all applicable FAA Requirements and shall provide documentation evidencing compliance to the Chairman of the County Board. All WECS towers shall be fitted with Aircraft Detection Lighting Systems (ALDS), or a comparable technology, suitable for meeting the FAA obstruction marking and lighting requirements.

F. Warnings

1. A reasonably visible warning sign concerning voltage and emergency telephone number contact information must be placed at the base of all pad-mounted transformers and substations. Said emergency telephone contact number must be answered by a person employed by the Operator 24 hours a day, 7 days a week.

2. All WECS towers shall be self-supporting, and no guy wire supported WECS towers shall be permitted.
3. At the entrance of each access road leading to a WECS, a reasonably visible warning sign shall be posted concerning voltage and provide emergency contact information.

G. Climb Prevention

1. All WECS Towers must be unclimbable by design or protected by anti-climbing devices such as fences with locking portals at least six feet high or anti-climbing devices 12 feet vertically from the base of the WECS Tower.

H. Setback Requirements

1. All WECS Towers shall be set back at least 4000 feet from any Primary Structure. The distance for the above setback shall be measured from the point of the Primary Structure foundation closest to the WECS Tower to the center of the WECS Tower foundation. The owner of the Primary Structure may waive this setback requirement; but in no case shall a WECS Tower be located closer to a Primary Structure than 1.10 times the WECS Tower Height or within the Fall Zone of the WECS Tower. No WECS Tower or foundation shall be placed upon any public or private sewage or water systems. Setbacks from any airport facility shall be pursuant to the regulations of the F.A.A. and the Department of Transportation.

2. All WECS Towers shall be set back a distance of at least 1.10 times the WECS Tower Height from public roads, third party transmission lines, and communication towers. The County may waive this setback requirement.

3. All WECS Towers shall be set back a distance of at least 1.10 times the WECS Tower Height or the Fall Zone, whichever is greater, from adjacent property Lines. The affected adjacent property owner may waive this setback requirement.

4. All WECS Towers shall be set back a distance of at least 750 feet from the Property Line of any Public Conservation Lands.

5. Any electrical substation constructed as part of the project shall comply with the setback requirements as established for such improvements for the zoning district in the Mason County Zoning Ordinance.
6. The Applicant does not need to obtain a variance from the County upon waiver by either the County or property owner of any of the above setback requirements. Any waiver of any of the above setback requirements shall run with the land and be recorded by the Owner as part of the chain of title in the deed of the subject property.

I. Compliance with Additional Regulations

Nothing in this Ordinance is intended to preempt other applicable state and federal laws and regulations.

J. Use of Public Roads

1. An Applicant, Owner, or Operator proposing to use any county, municipality, township or village road(s), for the purpose of transporting WECS or Substation parts and/or equipment for construction, operation, or maintenance of the WECS(s) or Substation(s), shall enter into a Road Use Agreement with the county and any municipality or road district having jurisdiction over the affected roads and roadway appurtenances.

2. The Applicant, Owner, or Operator shall cause to be conducted a transportation impact study acceptable to the county and affected municipalities or road districts to determine existing road conditions for assessing potential future damage. The study shall identify roads to be used for transport of WECS or Substation parts and/or equipment for construction, operation, or maintenance of the WECS(s) or Substation(s), the types and weights of loads to be transported, and the types of vehicles which are to be utilized. The study shall also include an estimate of the cost and description of work required to upgrade roads, bridges, and other structures to allow transport of over-weight loads. The owner hereby agrees to return roads, bridges, and other structures traveled over during the course of construction or maintenance of the WECS. The Applicant, Owner or Operator may be required to make pre-construction improvements and shall be required to repair or improve the roads and roadway appurtenances following construction of the WECS(s) or Substations. The Applicant, Owner, or Operator shall also be required to provide insurance coverage and financial security in amounts and forms acceptable to the county and any affected municipalities or road districts. The Applicant, Owner, or Operator shall also enter into an agreement (which
may be part of the project road use agreement or a separate agreement) addressing issues related to the roads and roadway appurtenances while the WECS(s) or Substation(s) are operational. The owner shall secure Financial Assurance in a sufficient amount for the purpose of repairing any damage to non-state public routes (including township, county and municipal routes/streets, storm sewers, bridges, and culverts) caused by constructing, operating, maintaining, or decommissioning of the WECS. The County reserves the right to determine performance adequacy.

K. Drainage Systems

The Owner shall be responsible for repairing, in a timely fashion, any damage caused to public drainage systems (or private agricultural) drainage systems by the construction, operation or maintenance of the WECS.

L. Height

The maximum WECS Tower Height shall not exceed 600 feet.

VII. OPERATION

A. Maintenance

1. The Owner or Operator of the WECS must submit, on an annual basis, a summary of the operation and maintenance reports to the County. In addition to the above annual summary, the Owner or Operator must furnish such operation and maintenance reports as the County reasonably requests.

2. Any physical modification to the WECS that alters the mechanical load, mechanical load path, or major electrical components shall require re-certification under Section VI(A)(I) of this Ordinance. Like-kind replacements shall not require re-certification. Prior to making any physical modification (other than a like-kind replacement), the Owner or Operator shall confer with a relevant third-party certifying entity identified in Section VI(A)(I) of this Ordinance to determine whether the physical modification requires re-certification.

B. Interference

1. The Applicant shall minimize or mitigate interference with
electromagnetic communications, such as radio, telephone, microwaves or television signals, caused by the operation of the WECS. The Applicant shall provide the applicable microwave transmission providers and local emergency service provider(s) (911 operators) copies of the Project Summary and Site Plan, as set forth in Section V.B.1. and V.B.3. of this Ordinance. To the extent that the above provider(s) demonstrate a likelihood of interference with its communications resulting from the WECS(s), the Applicant shall take reasonable measures to mitigate such anticipated interference. If, after construction of the WECS, the Owner or Operator receives a written complaint related to the above-mentioned interference, the Owner or Operator shall take reasonable steps to respond to the complaint.

2. If, after construction of the WECS, the Owner or Operator receives a written complaint related to interference with local broadcast residential television, the Owner or Operator shall take reasonable steps to respond to the complaint.

C. Coordination with Local Fire Department

1. The Applicant, Owner or Operator shall submit to the local fire department a copy of the Site Plan.

2. Upon request by the local fire department, the Owner or Operator shall cooperate with the local fire department to develop the fire department's emergency response plan. The Owner or Operator shall submit an emergency response plan approved by the fire department(s) having jurisdiction over the project territory, and shall provide a list of all hazardous materials associated with the project on site with the County EMA and all emergency response agencies having jurisdiction over the project territory.

3. Nothing in this section shall alleviate the need to comply with all other applicable fire laws and regulations.

D. Materials Handling, Storage and Disposal

1. All solid wastes related to the construction, operation and maintenance of the WECS shall be removed from the site promptly and disposed of in accordance with all federal, state and local laws.

2. All hazardous materials related to the construction, operation
and maintenance of the WECS shall be handled, stored, transported and disposed of in accordance with all applicable local, state and federal laws.

VIII. NOISE LEVELS

Noise levels from each WECS or WECS Project shall be in compliance with applicable Illinois Pollution Control Board (IPCB) regulations. The Applicant, through the use of a qualified professional, as part of the siting approval application process, shall appropriately demonstrate compliance with the above noise requirements. Within 60 days of the commencement of operations, the Applicant shall have post-construction noise testing done by a qualified third party to demonstrate compliance with IPCB regulations and shall provide a report of such findings to the county, provided that the county may extend such period if the applicant, owner or operator is unable to comply due to circumstances beyond their control.

IX. BIRDS

A qualified professional, such as an ornithologist or wildlife biologist, shall conduct an avian habitat study, as part of the siting approval application process, to determine if the installation of WECSs will have a substantial adverse impact on birds.

X. PUBLIC PARTICIPATION

Nothing in the Ordinance is meant to augment or diminish existing opportunities for public participation. Prior to any hearing on an application, the Applicant shall, at its sole expense, provide a minimum of one public information forum to be held at a time and location convenient for residents of the project area to disseminate information to the public related to the project.

XI. LIABILITY INSURANCE

The Owner or Operator of the WECS(s) shall maintain a current general liability policy covering bodily injury and property damage with limits of at least $5 million per occurrence and $5 million in the aggregate, with an annual certificate of insurance being provided to the county, with the county being named as an additional insured with the designation of primary and non-contributory. The Applicant, Owner or Operator shall promptly increase such liability insurance if such amount is increased in this Ordinance and the Applicant, Owner or Operator is notified in writing by the County, provided, new coverage limits imposed on an existing WECS shall not exceed the limit set forth in the ordinance at the time the initial application is approved plus an amount to account for the increase in the
consumer price index since the commencement of operation of the WECS. The Applicant, Owner or Operator shall provide evidence of such increased insurance to the County. Insurance coverage shall be maintained without interruption from the date of permitting through the decommissioning of all wind turbines. Certificates of Insurance acceptable to the County and in compliance with this section shall be filed with the County prior to the commencement of any work on the WECS and thereafter upon renewal or replacement of each insurance policy. These certificates and the insurance policies required under this section shall contain a provision that coverages afforded under the policies shall not be cancelled or allowed to expire until at least sixty (60) days written notice has been given to the County. The Owner or Operator shall, upon request, provide the County with a Certificate of Insurance to demonstrate proof of such coverage.

XII. DECOMMISSIONING PLAN

Prior to receiving siting approval under this Ordinance, the County and the Applicant, Owner, and/or Operator must formulate a Decommissioning Plan to ensure that the WECS Project is properly decommissioned. The Decommissioning Plan shall include:

A. Provisions describing the triggering events for decommissioning the WECS Project;

B. Provisions for the removal of structures, debris and cabling, including those below the soil surface;

C. Provisions for the restoration of the soil and vegetation;

D. An estimate of the decommissioning costs certified by a Professional Engineer to be updated every five years. The County may require a third party verification of the decommissioning costs estimations, and the cost of such verification shall be paid by the Applicant.

E. Financial Assurance, secured by the Owner or Operator, for the purpose of adequately performing decommissioning, in an amount equal to the Professional Engineer's certified estimate of the decommissioning costs;

F. Identification of and procedures for County access to Financial Assurances;

G. A provision that the terms of the Decommissioning Plan shall be binding upon the Owner or Operator and any of their successors, assigns, or heirs; and
H. A provision that the County shall have access to the site, pursuant to reasonable notice, to effect or complete decommissioning.

J. **A Non-functioning Wind Turbine shall be removed and decommissioned within 12 months of the Wind Turbine being deemed Non-Functional by the County, owner or operator, or other regulating entity.** The Owner or Operator shall submit to the County a list of turbines that are operating on or before January 1 of each calendar year, and also upon request by the County.

XIII. REMEDIES

A. The Applicant's, Owner's, or Operator's failure to materially comply with any of the above provisions shall constitute a default under this Ordinance.

B. Prior to implementation of the existing County procedures for the resolution of such default(s), the appropriate County body shall first provide written notice to the Owner and Operator, setting forth the alleged default(s). Such written notice shall provide the Owner and Operator a reasonable time period, not to exceed 60 days, for good faith negotiations to resolve the alleged default(s).

C. If the County determines in its discretion, that the parties cannot resolve the alleged default(s) within the good faith negotiation period, then existing County ordinance provisions addressing the resolution of such default(s) shall govern.

XIV. FEE SCHEDULE AND PERMITTING PROCESS

A. Upon submittal of the application for a WECS Project, the Applicant shall submit a check to Mason County in the amount of $30,000. These funds shall be placed in a guaranteed money market account and will be used to compensate the County for costs incurred during the review process for the WECS application. Should the actual costs to the County exceed $30,000, the Applicant shall be responsible for those additional costs and shall remit additional funds to the County within 15 days of receipt of a request from the County. Any amount remaining in the money market account after the County completes the application process and pays all bills and invoices shall be refunded to the Applicant.

B. All costs incurred by the County shall be paid by the Applicant. Owner or Operator. Costs incurred under this provision shall include, but not be limited to, the cost of experts, hearing officer(s) or
facilitator(s), and/or attorneys that may be used at any stage of the project, including the application review, hearing process, consideration of the application by the County (including County Board or Zoning Board of Appeals), permitting, operations phase and/or decommissioning phase. In addition, costs of any appeal or litigation resulting from any project, application, action, permit, or work undertaken or performed by the County shall be paid by the Applicant, Owner or Operator, including, but not limited to, the cost of experts and attorney's fees.

C. The permitting fee for each respective WECS structure shall be $20 per each foot in total height measured from the foundation pad to the blade tip in a vertical position.

D. Review of Application

1. Review by the County Board County

   a. The Mason County Board shall consider the application following the proper submittal of the application.

   b. If the Board County finds that all conditions have been satisfactorily met by the Applicant the application is complete in accordance with this Ordinance, it shall tentatively approve forward the application and forward such to the Zoning Board of Appeals for a public hearing on the application and proposed WECS Project pursuant to the Special Use Permit Procedure set forth in the Mason County Zoning Ordinance, provided that the notice requirements shall be as herein established pursuant to state law. The Zoning Board shall publish a notice for the hearing in a newspaper of general circulation in Mason County, Illinois, not fewer than 30 prior to the public hearing. The County's initial review is only a review as to whether the application is complete and ready for review and hearing before the Zoning Board of Appeals.

   c. The Zoning Board shall hold the public hearing and review the application at the hearing. After the public hearing, the Zoning Board shall make a report and a recommendation to the County Board that the WECS application be approved or denied, or approved with conditions. The Zoning Board shall transmit the
report to the County Board in advance of the next regularly-scheduled meeting of the County Board, or as soon thereafter as may be practical.

2. Review by the County Board

   a. Upon receipt of the Zoning Board’s report, the County Board shall consider the WECS application at its next regularly-scheduled meeting or at a Regular or Special Meeting as soon thereafter as may be practical. The County Board may deny or approve the Zoning Board’s recommendation about the application, or approve the recommendation with conditions. The County Board may also refer the application back to the Zoning Board for further study before making its final decision. The County Board may, by ordinance and without a further public hearing, adopt any proposed special use on receiving the report or it may refer the proposal back to the Board of Appeals for further consideration.

   b. If the County Board approves the application, it shall issue a Certificate of Permit and affix the Board’s seal upon the Permit together with the signature of the County Board’s Chairman and the Mason County Clerk. If it disapproves, the County Board shall set forth its reasons in its records and provide the Applicant with a copy.

E. Terms and Limitations of Permit

1. Permit Effective Date

   The Certificate of Permit shall become effective upon approval by the County Board.

2. Failure to Commence Construction or Operation

   Unless otherwise stated in the conditions of the Certificate of Permit, substantial construction work on the WECS Project shall commence within eighteen (18) months of the effective date of the Certificate of Permit unless such time period is extended by the County Board. If no extension of time is granted, the Certificate of Permit shall immediately terminate upon expiration of the eighteen (18) month period.
3. Revocation of Certificate of Permit

Upon finding a material violation of the terms of the Certificate of Permit, the County Board shall have the authority to revoke the Certificate of Permit after notice to the Applicant/Permittee and after affording the Applicant/Permittee an opportunity to be heard.

XV. INTERPRETATION

The provisions of these regulations shall be held to the minimum requirements adopted for the promotion and preservation of public health, safety and general welfare of County of Mason. These regulations are not intended to repeal, abrogate, annul or in any manner interfere with existing regulations or laws of the County of Mason nor conflict with any statutes of the State of Illinois, except that these regulations shall prevail in cases where these regulations impose a greater restriction than is provided by existing statutes, laws or regulations.

XVI. INDEMNIFICATION

The Applicant, Owner and/or Operator shall defend, indemnify, and hold harmless the County and its officers and employees from any and all liability and claims for damage, including but not limited to, claims for bodily injury, death, illness, sickness, disease, property damage, loss of property, diminution in property value, or any claim for loss and expense of any kind. The defense and indemnification of the County by the Applicant, Owner and/or Operator shall include attorneys' fees, court costs, settlement, judgment and any interest associated with such costs, fees or expenses incurred by the County or the County's insurer. Any duty of the Applicant, Owner and/or Operator to indemnify the County shall be to the greatest extent allowed by law.

XVII. PENALTIES

Any person who violates the terms of this Ordinance shall be guilty of a petty offense punishable by a fine not to exceed $500, with each week the violation remains uncorrected constituting a separate offense.

XVIII. SEVERABILITY

If any section, paragraph, clause, phrase or part of this Ordinance is for any reason held invalid by any court or competent jurisdiction, such decision shall not affect the validity of the remaining provisions of these regulations, and the application of those provisions to any persons or circumstances shall not be affected thereby.
XIX. REPEAL

All ordinances and regulations and amendments thereto enacted and/or adopted by the County Board that are inconsistent with the provisions of this Ordinance are hereby repealed, as of the effective date of this Ordinance. The repeal of any prior ordinance or its amendments does not affect or impair any act done, offense committed or right accruing, accrued or acquired or liability, penalty, forfeiture or punishment incurred prior to the time enforced, prosecuted or inflicted.

XX. EFFECTIVE DATE

This Ordinance is an ordinance necessary for the health and safety of the people of Mason County, Illinois, and shall be in full force and effect from and after its passage.
